EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

On page 1 of the specification, after the Title, delete the first sentence, and insert therefor:

-- This is a 371 of PCT/US00/25483 filed September 15, 2000 which claims benefit of provisional application 60/155,593, filed on September 24, 1999. --

2. The following is an examiner's statement of reasons for allowance: The prior art fails to teach or suggest the present invention, utilizing the specified combination of surfactants to improve water injectivity in a waterflood process. Taggard (4690217) teaches a similar process, but utilizes an anionic surfactant. Baker (4287950) teaches a process in which a gas is initially used, then a surfactant to improve oil recovery. A combination of an ethoxylated quaternary ammonium with an anionic surfactant is preferred (column 3, 32-35), as compared to the combination of the ethoxylated quaternary ammonium and nonionic surfactant of the present invention. The two processes further differ in that the present invention deals with the improving of the

water injectivity, while that of Baker uses the surfactant mixture to directly displace the oil.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
